Click System

By adopting Valinge 2G & 5G click system, easier & faster installation can be achieved.

INSTALLATION STEPS

Connect the side at an angle

Side until short side and drop

Use a soft-faced hammer to lock planks on the short side

Use a soft-faced hammer to properly lock the planks

MOST POPULAR-Vinyl Flooring

SPC is a particularly new product in the flooring industry. It not only gathers most of the current flooring material, but also provides better performance of being water-proof, rigid, dimensionally stable, and relatively environmentally friendly. Thus it can be safely used in areas with sustained exposure to moisture, such as bathroom, laundry room and kitchen. With good rigidity, SPC provides a quieter, warmer vinyl flooring with a cushioned backing attached, thus eliminating the imperfections from the subfloor which is normally transferred through LVT. SPC is available with locking system.

Rigid vinyl structure
